

GENERATING RELIABLE AND ECO FRIENDLY POWER

Shri H. K. Sharma,
CMD, SJVN

The Satluj Jal Vidyut Nigam Limited - SJVN is a joint venture of the Government of India (GOI) and the Government of Himachal Pradesh (GOHP) to plan, investigate, organize, execute, operate and maintain Hydro-electric power projects. SJVN is committed for generating reliable and eco friendly power by means of State of Art Technology, excellence in engineering and continual improvement in quality management. SJVN is an IT Savvy Corporation, has established and following sound business, financial and regulatory policies. Satluj Jal Vidyut Nigam believes that employees are its most valuable assets and has evolved growth oriented Human Resource Development Strategy.

SJVN's Future Projects

Since the commissioning of the largest underground 1500 MW Hydro Electric Power Project, NJHEP with the gigantic efforts made by its engineers, workers and all its associates, the first project allocated to SJVN, the Corporation expanded its base from a single project to a Multi Project and thereafter from a single state to a National Corporation. The Corporation is executing Rampur Hydro Electric Project (412 MW) in Himachal Pradesh and Devsari Hydro Electric Project (252 MW), Jakhol Sankri Hydro Electric Project (36 MW), Naitwar Mori Hydro Electric Project (34.5 MW) in Uttarakhand State. Further, SJVN has also been allocated Luhri Hydro Electric Project (775 MW) and Khab Hydro Electric Project (1020 MW) for preparation of detailed project report and execution thereafter. In order to become a front runner amongst National Organizations, SJVN is making all out efforts to get allocation of projects in Arunachal Pradesh and Sikkim.

Further, in pursuit of expansion of the corporation by acquiring new projects for development in neighboring countries to register pan Indian presence, a Memorandum of Understanding (MOU) has been signed with Govt. of Nepal on March 02, 2008 for development of 402 MW Arun - III Hydro Electric Project.

1500 MW NJHPS

SJVN presently is operating 1500 MW Nathpa Jhakri Hydro Power Station (NJHPS) which is an engineering marvel consisting of

62.50 m high concrete Dam on Satluj river; World's largest underground De-silting Complex, comprising four chambers, each 525 m long, 16.31 m wide and 27.5 m deep; Head Race Tunnel of length 27.39 km with dia of 10.15 m; 301 m Surge Shaft, deepest in the world; underground Power House with a cavern size of 222 m X 20 m X 49 m having six Francis Turbine Units of 250 MW.

Besides the social and economic upliftment of the people in its vicinity, the 1500 MW Nathpa Jhakri Hydro Electric Project is to generate 6950.88 million units of electrical energy in a 90% dependable year. It is also providing 1500 MW of valuable peaking power to the Northern Grid. NJHPS has achieved a cumulative generation of 22610 MUs by March 17, 2008.
