

Consistently setting higher benchmarks in the Indian Life Insurance Industry

Life Insurance Made Easy

Terms such as personal finance and financial planning are now more prevalent in the vocabulary of the common man, than they were a few years ago. The process of financial planning involves planning for one's long-term goals such as buying a house, planning for one's child's education, planning for a comfortable life after retirement, etc. This is where life insurance comes in. It has evolved from being just a loss protection tool to a wealth creation tool. We at ICICI Prudential Life Insurance offer you a wide range of retirement solution, wealth creation, education solution and health insurance plans which ensure that you meet your financial goals.

At ICICI Prudential Life Insurance "Customer First" is one of the values on which we have built our vision. We aim to achieve this through complete transparency in our dealings with our customer starting with the product and sales process up to the settlement of claims. We believe treating customers fairly and consistently form the foundation of enhancing customer satisfaction and delivering our promise. We offer the most comprehensive range of products across both retail and group businesses. We also offer life stage based products for customers who wish to take the benefit of the growing Indian economy but may not have the expertise to manage their funds. Several other flexible options like flexibility in policy duration, premium modes, insurance cover and fund options are also offered to the customer.

Besides, developing customer centric processes, we have introduced and set new and higher benchmarks in the industry. We have introduced concepts like self-service, to service the customer better. Technology enabled services that enable customers to transact through mobile and internet have been a success. The

customer can check the status of his policy, fund values, pay premiums and receive unit statements by just sending a SMS or visiting www.iciciprulife.com. The customer can also switch between different funds on the website.

We are present in 601 locations with 822 branches and 2,46,000 advisors. We have tied up with various local organizations in a bid to provide cash management solutions to customers in local areas enabling them to make their premium payment at a location close to them, as per their convenience. Our wide distribution network ensures that we are only a step away.

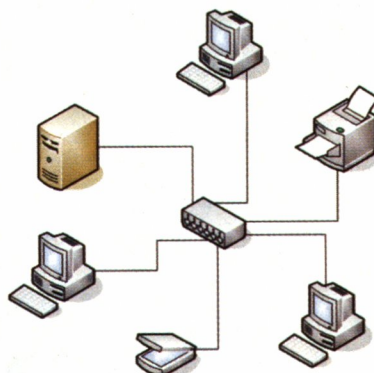

ICICI Prudential Life offers seven innovative fund options: Flexi Growth, Flexi Balancer, Balancer, Protector, Preserver, Multiplier and R.I.C.H. to its customers. These fund options give the customer the choice of investing as per his investment style. A customer who prefers investing in the equity market can opt for the multiplier fund whereas the protector fund could be used by a customer who does not wish to

take any risk with his investment.

Today, ICICI Prudential Life Insurance is one of the top wealth managers in the country with an AUM of over Rs 28,000 crores. Keeping in mind the interest of the long term passive systematic investor, the company adopts a conservative investment philosophy.

In today's competitive scenario where the consumer is spoilt for choice, customer's buying decision depends on a good brand name that is synonymous for trust, quality and premium service.

ICICI Prudential Life has always designed innovative product and service offerings, followed transparency in policies and processes all with the single objective of serving the customer better and guaranteeing his long-term goals. Jeetey Raho!

Jeetey Raho!
