Chairman & Managing Director

community development programmes in and around its projects. NTPC is providing support to three specialized eye care centers at Bhubaneswar, setting up two polytechnic institutes at Uttarakhand, providing employment to 434 physically challenged persons.

• **The NTPC Foundation for Corporate Social Responsibility** addresses specific domains of promoting socio economic reliance among physically challenged persons. *NTPC Foundation's Vision* - To serve and empower the physically challenged and economically weaker sections of the society.

• NTPC is a member of Global Compact a UN initiative for corporate social responsibility

• **Distributed Generation Projects.** The small power generation units set up by NTPC in states of UP, Chhattisgarh and Rajasthan are vehicles of socio-economic transformation among remote and underprivileged communities.

➤ SUPPORT TO THE SECTOR

• **Commitment to Sector Reform and Improvement** – Under the Accelerated Power Development and Reform Programme (APDRP) and the Rajiv Gandhi Grameen Vidyutekaran Yojana, NTPC is providing major support in achieving sectoral targets. Under the '**Partners in Excellence (PIE) Programme**' launched by the Ministry of Power to improve the performance of underperforming power stations of state utilities, NTPC has brought about performance turnaround in 13 stations, having operating

capacity of 5,050 MW. Additional generation of 2,833 million units corresponds to equivalent capacity addition of 430 MW.

➤ STRONG TEAM OF POWER PROFESSIONALS

NTPC has a pool of capable and committed manpower, which is its core strength, the key factor behind all its success and achievements. A number of HR initiatives have been taken for the well being and continuous development of the strong talent pool of 24000 employees. The HR vision of the company is "to enable our people to be a family of committed world class professionals, making NTPC a learning organization.

➤ TECHNOLOGICAL EDGE

NTPC is engaged in continuous improvement of its operational processes and project implementation methods, it is also engaged in futuristic technology research. Accordingly, NTPC has taken several technology initiatives to take care of the requirements of economics, efficiency and the environment.

The Company has adopted enhanced steam parameters in the sub critical 500 MW units and has already introduced large sized super critical units with the aim to improve efficiency levels which, in turn, will lead to reduction in CO2 emissions and contribute to better environment management and sustainability.

• NTPC has joined major international initiatives, for undertaking research and development programmes for working towards cleaner power generation technologies.

• NTPC has set up an Energy Technologies Centre for undertaking fundamental research and as a matter of policy, company has decided to set aside 0.5 per cent of its profits for research and development.

➤ CORPORATE GOVERNANCE

Transparency and sound governance make our investors and shareholders, including small shareholders feel very confident about their valuable resources invested with the company. NTPC's governance practices are acknowledged for their soundness and are also awarded by prestigious forums. NTPC has gone beyond compliance to self regulation based on conscience, openness, professionalism and accountability for a long-term relationship with investors.

Major thrust to Hydro-NTPC Koldam project

➤ A CATALYST FOR CHANGE, DEVELOPMENT AND GROWTH

While the past performance of NTPC shows that it was a catalyst for change, through its leadership in the areas of project implementation, technology and performance, turning around of underperforming power plants and setting of industry benchmarks; the present positions NTPC as a catalyst for development through its key role in adding capacity and helping the country become self sufficient in power, by becoming a supplier of choice and introducing cleaner and more efficient technologies; the future role of NTPC will be as a catalyst of growth increasing its market share, investing in research and introducing cutting edge technologies, having a more global presence and becoming a role model for the power sector.
