

TEHRI HYDRO DEVELOPMENT CORPORATION

Providing quality, affordable and sustainable Power, with commitment to Ecology and social values

Hydro power is a renewable, economic, non polluting and environmentally benign source of energy best suited for meeting peaking power demand. River Bhagirathi originating from Gaumukh Glacier has vast potential for power generation & Irrigation. Tehri Power Complex is the first Major attempt to harness this potential.

■ ABOUT THE CORPORATION

Tehri Hydro Development Corporation (THDC), a Joint Venture Corporation of Govt. of India and Govt. of U.P. is responsible to develop, operate and Maintain the Tehri Hydro Power Complex and other hydro power Projects.

The completion of the Tehri Dam Project is the landmark achievement in the history of river valley projects in the country and has firmly established THDC's presence in the Power Sector. After Bhakra Dam, which ushered in the Green

Revolution, the Tehri Project is the first Storage scheme to come up in the Northern Region. Unlike the Run-off-the-River schemes, storage schemes offer the advantage of peak power and water benefit round the year. Tehri Project is one of the most studied Hydro Electric Projects from the engineering and geo stability point of view in the country.

With the commissioning of the Tehri Dam Project, and the balance stages of the Tehri Complex already under implementation, THDC has developed the capabilities to undertake Large Multi Purpose Hydro Power Projects from Conceptualization to Commissioning. THDC aims to be a major global player in the Power Sector, in providing quality, affordable and sustainable Power, with commitment to Environment, Ecology and social values.

THDC has fulfilled its commitment to contribute towards capacity addition of 1000 MW during the X Plan. THDC plans to contribute capacity addition of 1400 MW in Hydro during XI Plan with the commissioning of 400 MW Koteshwar HEP
