

and 1000 MW Tehri PSP, so that full benefits from the 2400 MW Tehri Power Complex are realized. In addition, THDC is working on Projects totalling 1739 MW for benefits during XII Plan.

■ FINANCIAL PERFORMANCE

THDC has reported a Net Profit of Rs. 1309.13 Million in the first year of commercial operations. The total sale of energy during the year was Rs. 4441.59 Million.

■ THDC PROJECTS- AT A GLANCE

Projects		
UNDER OPERATION		
Tehri Dam & HPP	Bhagirathi	1000
Total		1000
UNDER CONSTRUCTION		
Koteshwar HEP	Bhagirathi	400
Tehri PSP	Bhagirathi	1000
Total		1400
UNDER DPR & INFRASTRUCTURE		
Vishnugad Pipalkoti	Alaknanda	444
Kishau Dam	Tons	600
Total		1044
UNDER SURVEY & INVESTIGATION		
Karmoli HPP	Jadhganga	140
Jadhganga HPP	Jadhganga	50
Gohana Tal HPP	Birahi Ganga	60
Maleri Jhelam HPP	Dholiganga	55
Jhelam Tamak HPP	Dholiganga	60
Bokang Bailing HPP	Dhauliganga (Kali)	330
Total		695

■ TEHRI HYDRO POWER COMPLEX (2400 MW)

Tehri Hydro Power Complex (2400 MW), comprising of the following components:

- Tehri Dam & Hydro Power Plant – 1000 MW (Stage-I of the Complex)
- Koteshwar Hydro Electric Project – 400 MW
- Tehri Pumped Storage Plant – 1000 MW

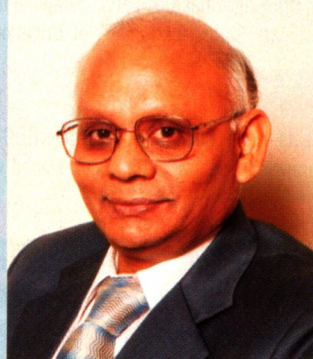

Benefits from the Tehri Hydro Power Complex:

- Addition to the installed generation capacity in the Northern : 2400 MW Region (1000 MW on completion of Tehri Stage-I)
- Annual Energy availability (Peaking) : 6200 MU (3568 MU on completion of Tehri Stage-I)
- Irrigation Facility (additional) : 2.70 lakh ha.
- Stabilisation of Existing Irrigation Facility : 6.04 lakh ha.
- 300 cusecs (162 MGD) of Drinking Water for Delhi, to meet the requirement of about 40 lakh population.
- 200 cusecs (108 MGD) of Drinking Water for towns and villages of Uttar Pradesh, to meet the requirement of 30 lakh population.
- Integrated development of Garhwal Region, including construction of New Tehri Town with provision of all civic facilities; improved communication, education, health, tourism, development of horticulture, fisheries, and afforestation of the Region.

Tehri Dam & HPP STAGE-I (1000 MW)

The 1000 MW Tehri Power Station is fully operational.

The 260.5m high Tehri Dam is among the highest Earth & Rockfill dams worldwide. The Tehri Dam has already been raised to full height.

R.S.T. Sai
Chairman and
Managing Director

The Corporate Plan prepared by THDC, which includes the financial projections for the next decade, has revealed that the Company could endeavor to take up additional projects of at least 2500 MW capacity over the next ten years from its own resources.

Koteshwar Hydro Electric Project (400 MW)

The Koteshwar Hydro Electric Project comprises a 97.5 m high Concrete Gravity Dam and 400 MW Hydro Power Plant having four units of conventional Turbine/Generator sets of 250 MW each at Koteshwar, 22 Km. downstream of Tehri. Koteshwar Project is a run-off-river scheme with minimum diurnal storage. Annual Energy generation from the Project is 1234 MU (90% dependable year)

The Project is scheduled for commissioning by Dec'10.

Tehri Pumped Storage Plant (1000 MW)

The Tehri PSP scheme, having four reversible units of 250 MW each has been envisaged to generate 1000 MW of peaking power for enhancing system reliability and also to provide balancing load to the thermal base generation during off peak hours. The operation of Tehri PSP is based on the concept of recycling of water discharged between upper reservoir to lower reservoir. The reservoir created by the Tehri Dam would function as upstream reservoir for this Project, while the Koteshwar Dam reservoir shall be the lower reservoir.

The Project is scheduled to be completed in the year 2011-12.

Vishnugad Pipalkoti Project (444 MW)

The Project is located in Chamoli Distt. on the river Alaknanda. The Project envisages construction of a Gated Diversion Dam, 65m high near village Helong. The dam shall divert the river water of Alaknanda through a water conductor system to an underground Power House with installed capacity of 444 MW (4 x 111 MW).

The Project is also under consideration for World Bank funding.

Kishau Dam & Hydro Power Project (600 MW)

Kishau Dam is a multipurpose Project on river Tons (a major tributary of Yamuna
