

The Dream That Blossomed and Bore Fruit

Saveetha group of Institutions were originally governed by the Saveetha Medical and Educational Trust and today it has been given University status. With Dr. N. M. Veeraiyan as Chancellor, and Dr R Rajagopal as Vice-Chancellor, it now has various colleges in diverse educational disciplines under its umbrella, and sprawls over two campuses, one on Poonamallee High Road of 30 acres and another a 130-acre area in Thandalam.

University status meant that there was freedom to formulate courses, and the Chancellor, Dr Veeraiyan, undertook the task with fervour. In Dentistry several new subjects including Implantology and Aesthetic Dentistry were added to the undergraduate courses. By these means, Dr Veeraiyan intended to infuse new life into the system of dental education in the country, and benefit the segment as a whole. Presence of eminent personalities of National and International repute like Dr. Robert Orchardson from University of Glasgow and Dr. Balasubramanian Director NFTDC Hyderabad on the Academic Council helps in implementing progressive change.

Saveetha Dental college is a rare combination of hard work, dedication and service. The college nourishes the young and budding talents in the field of dentistry and medicine and helps to bring them out as one of the nation's best dentists, says Poornima, a final year BDS student.

Students from the college are doing well in all-India ranking. Says Arvind and Ravindra Jain who secured the 1st & 2nd national rank, an unique achievement for any institution:: We would thank our teachers who encouraged, motivated and guided us with their vast experience and friendly nature to crack the AIPGE 08 exam and we owe our success to them.

A Torch-Bearer among Dental Colleges

The reputation of the Dental college as a standards-setter in Dental Education is well deserved. Among the aspects that set it apart is the opportunity it provides to obtain both Membership in Dental Surgery (MFDS) and Membership in Oral and Maxillofacial Surgery (MOMS) under a collaboration with The Royal College of Physicians and Surgeons, Glasgow. The prestigious UK College conducts examinations at Saveetha University, one among the few overseas centres of this exam. It tests the candidates' understanding of diagnosis and treatment planning over a wide range of problems in relation to Dental Surgery and Oral and Maxillofacial Surgery, and grants deserving students the respective Membership. Awarding of the highest score among all dental colleges in Tamilnadu by the Highlevel committee of Govt of Tamilnadu is another endorsement of its position as a standard-setter.

With a daily outpatient strength of 700 patients, one of the largest in the country, students have ample exposure to both common clinical problems and rare diseases, even so rare that have not been reported before. A rare type of jaw tumour reported for the first time in the world would get its name after this university !!
