

A.P.J. ABDUL KALAM S. RAMANUJAN VIKRAM SARABHAI

RAJA

Q: Which British university did Bhabha do his mechanical engineering from?

A: Cambridge University

Q: In January 1966, he died in a plane crash near Mont Blanc, while heading to Vienna. What was the name of the aircraft in which he was travelling?

A: Kanchenjunga, Air India Boeing 707

Q: Under which Nobel laureate did Bhabha work first when he came back to India in 1939?

A: Sir C.V. Raman

Q: Bhabha recognised heavy electron particles in cosmic rays. What did he call them?

A: Meson

Q: Which prestigious UN conference did he preside over ?

A: The first UN conference on Peaceful Uses of Atomic Energy, held in Geneva in 1955

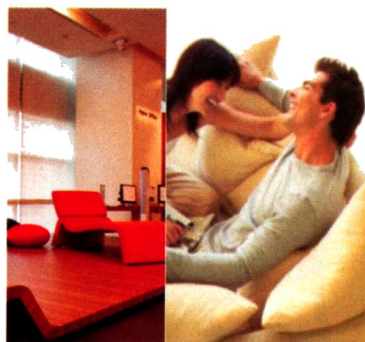

Energy Establishment, Trombay, was named Bhabha Atomic Research Centre (BARC) after him.

He was a multifaceted personality, as fluent with complex mathematics as he was with the nuances of western music. He was an artist and architect. He took a keen interest in the construction of laboratories and buildings which came up at BARC so that they appeared aesthetically appealing. His paintings are on display at the TIFR and BARC campuses.

Cruel fate snatched this illustrious son of our country at a critical phase of our atomic energy programme in a plane crash in 1966. He was a great patriot and always proud to be an Indian.

The author is the director of BARC.

UAN SUNDARAM
CONSTRUCTION & REAL ESTATE (P.) LTD.

Coming up with **Neticulous** residential

Town in

Jaipur with aesthetic sensibility.

giving you with great style.

a place of beauty, greenery & granite.
