

...revolutionizing auto security

DISTRIBUTION OPPORTUNITY WITH WORLD LEADERS IN AUTO SECURITY

10 crore vehicles on Indian roads (1.8 lac vehicles at an average in each district) and at least 1 crore adding every year; about 80 new car and bike models lined up for launches in 2008; the menace of innumerable vehicle thefts; a risk quotient so high that motor insurance constitutes a whopping 40% of 20000 crore rupees of premium in the general insurance domain and the insured cover value of vehicles reigning around 3 lac crores!

Yet, many of us chose to ignore the size of the vehicle security & safety market?

Since vehicle thefts assume huge consequences, well beyond loss of assets, all of us in the society may like to address this for a reprieve to all: the vehicle users; the insurers; the law-keepers and the society at large.

We had made a beginning some 10 years ago when we brought to you the world no. 1 in mechanical car security in the form of Mul-T-Lock, universally acknowledged as a credible domain leader with not a single vehicle known to have been stolen.

And, in terms of the latest that the technology has to offer, we bring to you a revolutionary 2-way security system from the world leaders, which alert you on a hand-held LCD transmitter (remote) against any tampering to the vehicle until a distance of 5 kilometers, and thwart theft attempts very effectively. Hitherto, prima facie, there have been more of electronic convenience systems (remote door locking etc) rather than security systems, and you could generally operate only 1-way and that too, for less than a 100 meters!

As a major breakthrough, Autosafe is on the verge of having discounts on premiums allowed from insurance companies who are in advanced stage of talks with us. That should render the world's leading systems virtually free when amortized over 2 to 4 years!

In terms of product portfolio, Autosafe offers a host of utilitarian gazettes like Parking Sensors (for reverse assistance) which is a revolutionary offering again. And very soon, Autosafe will bring to you GSM/GPS systems that shall help you secure & track your vehicle anywhere in the world!

Duly emphasizing on the highest standards of equipment service, Autosafe is looking for enterprising and committed distributors across the country who would provide the best of services to our valued patrons on strong warranties.
