

■ NIKO PORTACABIN SYSTEMS : Niko Building Systems is a complete NIKO EPS PANELS system designed special for fast construction of residential, commercial and industrial structures in all climates and terrains. It's an attractive, cost effective and energy efficient alternatives to conventional constructions. NIKO EPS PANELS are with only 1/3 thickness of a conventional brick wall. It insulates 20 times better than concrete and 8 times better than brick construction. Its Tendura panel provides excellent sound absorption property. The NIKO PORTACABIN SYSTEMS allows for practically unlimited versatility. The composite materials resist deterioration from heat, humidity, ultraviolet radiation, rust, rot and vermin infestation, making THE NIKO PORTACABIN SYSTEMS ideal for tropical and sub tropical location. Fully erected and anchored, it becomes quite apparent that the unique design configuration of the NIKO BUILDING SYSTEM will enable it to withstand hurricane force winds and seismic shock of earthquakes/
