ARE YOU BEING MISGUIDED IN THE NAME OF WEIGHT LOSS ?

Weight loss and health consciousness is at an all time high in the society today and people are looking at services which help them to improve their health state whilst losing weight, but unfortunately a lot of people and business people are misleading the patients on weight loss. Typically such so called specialists are not qualified enough to know about the human body and how safe weight loss happens, so they simply put people on a low calorie or starvation plan. Others who promise quick weight loss also talk about miraculous so called machines and gadgets which passively exercise your body and while you sleep / relax in a chair the body fat melts away, such products not only do not work but also cause long term damage to the body. Since there are so many so-called commercial centers and unqualified so-called specialists it is best to ask the following questions

before joining any center. 1) Is there a full time doctor in the clinic who understands the body and its functioning and can identify your metabolic type? 2) Can we meet the patients in the center who are satisfied? 3) How will I maintain the weight? 4) How about follow-ups? The truth of the situation is that correct diagnosis, and lifestyle training along with what food suits your body is the only scientific way to weight loss
