

THE CAR WITH GENIUS IN ITS GENES.

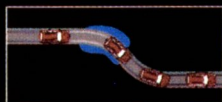

THE TECH-PACKED SCORPIO V-SERIES

Here's a car that's loaded with innovations. The new engine is engineering nirvana. Named **mHawk**, this light-weight, turbocharged CRDe engine comes with all-aluminium cylinder heads, variable geometry turbine, and top-mounted intercooler.

It can do 60 kmph in 5.7 seconds flat! With dramatically low noise and vibrations. Mileage is higher.

The brakes are **ABS**. Then there is **Cruise Control**. **Tyretronics**. Music system controls on steering wheel. An **Intellipark** system. **Smart sensors** on lights and wipers. **Nano technology** coats. Anti-pinch window.* Anti-theft **Immobiliser**. Etc. Etc. Etc. Seriously, why would you want to drive any other car that insults your intelligence?

ABS

Music and Cruise Control
on steering wheel

Tyretronics

Intelligent rain/light sensors

SCORPIO V-SERIES

Nothing else will do
