

When a leader sees green it is not out of envy - but out of concern.

At Uflex we are alive to the global hazard that organic waste creates. This is reflected in our efforts for waste management. And for this we have been awarded with the prestigious Waste Management award from Switzerland.

Our attitude for consumer safety and concern also runs deep. Which is also why our Polyester film plant in UAE has an ISO 14001:2004 certification for Environmental Management Systems Standards, is accredited with ISO 22000:2005 certification conforming to hygiene, food safety application for packaging and the HACCP based Food Safety System.
