

"I firmly believe that education without placement assistance and assurance has not meaning as it leaves an educated individual in lurch. Therefore, Industry interface is extremely important in an Educational Institution. For this, Galgotias College of Engineering and Technology provides out of the box teaching techniques such as case studies, group discussions etc. Teaching here goes beyond the classrooms. Students are familiarized with the functioning and environment of the real corporate world."

Suneel Galgotia
Chairman

In fact, Mr. Suneel Galgotia, Chairman, Galgotia Group of Colleges stresses upon shaping the all-round competence of his students and making them "assets to the society, industry and the world." That's what he believes is the true mark of the Glorious galgotian. In his words, "The focus here is on personalized attention, international-level education, leadership quality and character building."

What is the role of Career Planning & Development Division (CPDD)?

CPDD has created a world of difference and given a cutting edge advantage to Galgotians. CPDD is constantly working on various training and motivational modules for

them. The training imparted includes soft skills like stress and time management, recent technological advancements, corporate skills along with analytical, out-of-the-box thinking techniques that students perform at their best potential. The whole exercise is to increase the employability of the students and the emphasis is on teaching them what to expect in their jobs after they graduate. The institution continues to make an enviable track record of great

that its learning environment is well-structured, organized and stimulating. The enlightened students step into the professional world with the wisdom and confidence gained at the institute. This plays a pivotal role in enriching their lives and getting placements in the best of corporate houses. Moreover, the active experiential learning practised here is overwhelmingly appreciated by many renowned companies thronging as eager takers of brilliant brains. Certainly, this finest breed of engineers and software professionals establishes GCET's patent of excellence throughout the world.

Amidst an inspiring and invigorating environment, students undergo extensive and intensive learning exercises and practical training that turn them into top-notch professionals. Here teaching goes beyond classrooms. They attend simulated programs that give them hands-on experience of the real industrial sector thus preparing them really well to win the big battles in corporate warfare.

Each and every Galgotian is painstakingly groomed and nurtured as a world-class product determined to prove one's expertise and worth in the highly competitive and quality-driven world. Therefore, all efforts go in enriching one's academic, intellectual and professional competencies. What sets apart GCET from the rest is its teaching pedagogy, industry interface and emphasis on technical and soft skills. It is made extremely sure that the outgoing student walks into the professional world armed with excellent qualification as well as a strong and convincing character.

Students script story of excellence

1st prize at IIT, Roorkee, 1st and 2nd prizes at IIT Kanpur and positions held in competitions held at DEC Techfest and IIT Delhi indicate the competitive spirit and ability of Galgotians. Projects done by students and highly valued by TCS talk of the inclination to innovate. Alumni Galgotians are positioned in the upper echelons of the corporate industry, opening the royal roads for future Galgotians.

The faculty sets new standards

The faculty presented about 50 papers last year which is the maximum for any private engineering college in NCR. GCET also boasts of the maximum number of M.Tech/Ph.D.s in its faculty in the NCR.

placements. Every year, a meritorious batch of graduates enters the industry equipped with GCET value-added education. While India is fast emerging as the global IT hub, GCET is definitely the place where the real IT talent is.

Progressing passionately on the mission to help Galgotians tap their enterprising abilities, GCET has signed a MoU with National Entrepreneurship Network, an organization supported by IIM Bangalore, IIT Bombay and Stanford University. The faculty has been extensively trained through a number of lectures from established entrepreneurs at seminars conducted from 4th to 8th February 2008, celebrated as "Entrepreneurship e-week" all over the country. CPDD has an Entrepreneurship cell and is also launching an Incubation Centre for which it has received a financial grant of Rs.30 lakhs and Rs.24 lakhs respectively for Industry Institution Partnership Cell (IIPC) and Entrepreneurship Development Cell (EDC). EDC is working for awareness program amongst the Galgotians and those students from other institutions in the region, conducting awareness camps, lectures and workshops to become entrepreneurs rather than chase vacancies.
