other students of the institute who share his zeal. "Working in IIT-D will give a lot of credit to our work," he says.

For third-ranked IIT Mumbai (IIT-M), that has moved up one position from last year, there's yet another reason to celebrate—its golden jubilee. Spread across a 550-acre campus it adds yet another feather to its cap this year. A first in India, it has introduced an undergraduate B.Tech programme in energy science and engineering. "This course will prove very useful, especially since energy conservation is the need of the hour," says Deputy Director Dr Juzer Vasi. The institute has set up a separate department for this course that already has 12 teachers but plans to double this soon, adding to its faculty of 425.

Well known for its chemical, electrical and computer science engineering programme, IIT-M is proud of its Ph.D students also. "We currently have over 1,300 Ph.D students," says Dr Vasi. The 5,200 student strong institute currently boasts of 12 departments, 11 multi-disciplinary centres and three schools of excellence that offer courses in engineering, pure sciences, design, management and humanities. Besides academic and research achievements, the institute is also known for its inter-college extravaganza, Mood Indigo.

Fourth ranked IIT-KH is making huge strides with its brand new M.Tech programme, one in water management and the other in infrastructural design.

For IIT-C, which ranks fifth, the leap

will come once its newly set-up research park becomes functional. A first of its kind in engineering institutes in India, the park will provide unique collaborative opportunities for industry and IIT-C academia to facilitate innovation. "IIT-C believes in developing analytical skills in students. This is why finance companies are picking up our students in campus interviews" says S. Shanthakumar, dean of academic courses at the institute.

Sixth and seventh ranked, IIT Roorkee (IIT-R) and IIT Guwahati have held on to their respective positions. Though bestowed with the IIT tag only in
