

Capt. J.K. Dogra
CEO

■ CWAT Training through quality & safety

— CORPORATE WINGS AND AVIATION TECHNOLOGY (CWAT),

a company launched in Apr 2007 under the aegis of Capt. Jatinder Kumar Dogra, is owned and managed by him. An Airline Pilot by profession and a senior Commander on Boeing 737-700/-800 aircraft, Capt. Dogra is also type

rated on Bombardier CRJ-200, Cessna Citation 550, Beach King Air C-90, Cessna 404 Titan, Piper Chieftain Panther, Piper Navajo, Piper Aero Star to name a few. He is also an Aviation Engineer who has numerous Aircraft Maintenance Engineering licenses. The company offers complete package for commercial pilot license to be obtained from reputed flying training schools in Canada. At present three high standards flying academy namely **Syuest Aviation** at Vancouver, owned and managed by Capt. Ron Reynold who is CFI and Transport Canada designated examiner, **Westside Aviation** in Pitts Meadows, Vancouver, headed by Capt. Sarkaria who is an airline Pilot and instructor himself and **Blue Bird Flight Academy** in Toronto with Mr. K. Bajwa as one of the director, provides best of the training to the students of CWAT. All Students Pilots are carefully examined and interviewed personally by Corporate Wings and Aviation Technology. Only those who are found fit are given admission for the Pilot training program. The aim of the company is to provide its customer state-of-the-art training with best value for the money. CWAT has its own Ground Training Academy with a dedicated team of highly qualified Instructors like Gp Capt Bagchi (Retd), Gp Capt De (Retd), Wg Cdr Chakrabarty (Retd) and others forming the back bone. The abinitio pilots are grilled with a one month comprehensive ground classes in Navigation, Meteorology, Regulations and Air Technical ground classes prior to the commencement of Flying. CWAT also runs ground classes for DGCA Composite paper and recently the company has started ground classes for Airline Transport pilot license examination also. The company ensures that all the students who come back with Canadian CPL are suitably placed in the Airlines Industry in India, after getting their Licenses converted to Indian CPL with CWAT assistance. Capt Wasim Khan with Air India, Capt Karan Kohli with Indian Airlines and Capt Rajesh Mirani with Jetlite are few of the many CWAT students who are flying with major Airlines in India. The company has recently tied its hand with Federation of Indian Pilots (FIP). FIP has its own Institute called **IAAS (Institute of Aviation & Aviation Safety)** which gives B.Sc degree to its students in Aviation. Affiliated to Mumbai University, IAAS, as a part of its course curriculum, sends its students for Pilots Training to Canada through CWAT. Many of IAAS students are currently doing flying training in Canada in the above mentioned Academies. Company has recently entered into an MOU with IAAS to award B.Sc. degree in Aviation to CWAT students enrolling for a three year flying training programme.

V.K. Nangalia
Chairman

Dr. P.K. Bhardwaj
Medical Director

■ Saroj Hospital & Heart Institute

— Saroj Hospital & Heart Institute is a 150-bedded Multi Superspeciality Hospital which caters to the healthcare needs of a large population of North-west Delhi and its adjoining areas.

The Hospital has state-of-the-art Operation Theatres and Cardiac Cath Lab to boast of. The Hospital is one of the centers for the Minimal Access Surgery and provides quality, state-of-the-art services in minimal access surgery to an ever-expanding population.

According to Dr. P. K. Bhardwaj, Head of the Dept. of Laproscopic, Endoscopic and general surgery, who is also the Medical Director of the Hospital. "Laproscopy has the advantage of lesser post operative pain, early recovery, good cosmesis as well as the chance to rule out other Pathology present in the same surgical sitting." For this operation the Surgeon makes a few tiny incision in the abdomen and inserts surgical instruments and a miniature telescope with mounted video camera into the abdomen. The camera sends a magnified image of the organs to a monitor, giving the surgeon a close up view of the organs and tissues. While watching the monitor the Surgeon uses the instruments carefully to get rid of the problem i.e. Gallstones, Appendix etc. The recovery occurs within a day or two followed by rest at home. "The patients have less pain and complication, as the abdominal muscles are not cut during the Laproscopic Surgery" — concludes Dr. P. K. Bhardwaj. The Hospital is committed to its mission of providing excellent healthcare services at an affordable cost. The Hospital has all modern facilities like wi-fi enabled wards, OPD registration on line, smart card and touch screen medical information Kiosk to name a few. Overall a complete healthcare center.
