

Coconut Oil THE NECTAR OF GOODNESS

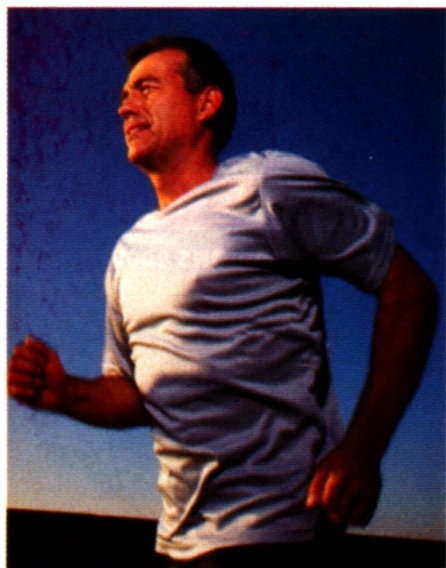

Coconut and Coconut Oil has been the subject of controversy for nearly three decades. Much of the propaganda against saturated fats and coconut oil is based on myths and half-baked truths. Yes. Coconut Oil is a saturated fat, but with a difference.

Never before in the history of man it is so important to emphasise the value of lauric oils. The medium chain fats are found exclusively in lauric oils. The Medium-chain fats in coconut oil are similar to fats in mother's milk and have similar nutraceutical effects.

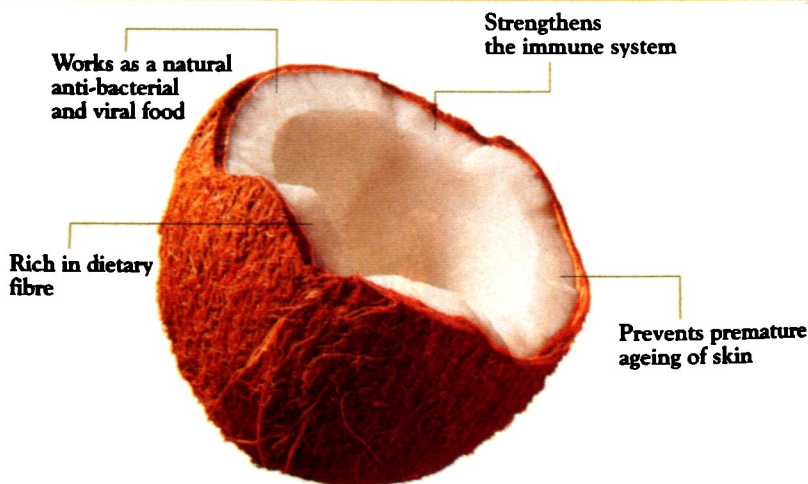

John J. Kabara, Ph. D., Professor Emeritus, Michigan State University, USA.

Isn't it time we did a rethink? Studies have proven that physical inactivity and smoking are the leading risk factors affecting cardiac health. It is followed by overweight, hypertension and diabetes.

Triglyceride level was similar among both the groups. In cardiac patients, consumption of coconut oil along with normal diet did not elevate total or LDL cholesterol levels. Moreover, the average triglyceride levels for the group which 'used only coconut oil' were way below.

Regular use of Coconut can change your life

COCONUT OIL AND CARDIAC HEALTH: Interesting revelations

In order to explore the impact of coconut oil on cardiac health, Sree Chitra Thirunal Institute for Medical Sciences, under the Dept. of Science and Technology, Government of India conducted a study. 463 healthy individuals and 552 cardiac patients within 25-65 age limits were chosen for the study. The subjects were grouped as 'Those who use only coconut oil' and 'those who use all types of oils'. After various tests it was found out that the average cholesterol level was similar among the two groups. Also, the average

SATURATED FAT - with a difference

Saturated fats are classified into two primary categories (1) long chain fats and (2) short and medium chain fats. Medium chain fats in coconut oil are similar to fats in mother's milk. Thus, despite the fact that saturated fats are harmful, those present in coconut oil are in a league of their own. Lauric acid, prominent among the medium chain fatty acids present in Coconut Oil has qualities similar to Mother's Milk. When Lauric acid enters human body it gets converted to Monolaurin, an immunity enhancing compound. Sushruta Samhitha, an ancient ayurvedic text describes coconut oil as 'Heart's favourite tonic'.
