

SUMEET INDER SINGH

"Gimme More",
February 25, 2008

"Rising salaries are a veritable proof of India shining despite a major slowdown in the economies that matter the most."

V.K. TANGRI, *Dehradun*

Wage War

Good salaries and profits arising from favourable market environment have concealed the blight of low productivity ("Moolah Huge", February 25). And this inverse relationship between productivity and earnings is all set to grow with the sixth pay commission coming into effect soon.

Y.G. CHOUKSEY, *Pune*

Rising salaries notwithstanding, the young today are still dissatisfied because they are overworked and are unable to spend quality time with their families. Unreasonable expectations and deadlines are the side effects of high salaries.

MAN MOHAN BHATIA, *Delhi*

Salaries may have gone up, but so have the stress levels arising out of fierce competition. Giving employees a high pay is not

enough. We have to keep a check on the rising prices of essential commodities and at the same time avoid the rat race of buying happiness in installments.

RATAN SHARGA, *on e-mail*

The colours used to print Indian currency are perhaps of sub-standard quality. That is why, in spite of their weight, they've failed to outsmart the dollars.

RAJNEESH BATRA, *Delhi*

Increasing salaries are a dream come true. We are now sailing in the same ship as the Americans. Indians have at last got their due.

VINEET BHALLA, *Bhilai*

The story rightly glorifies Indian companies across the spectrum. However, given the dismal state of our primary education system, one wonders how on earth will we be able to maintain our much vaunted growth

rate if we don't produce enough educated Indians for the 21st century.

VITULL K. GUPTA, *Bhatinda*

The cover story about rising salaries was very interesting. However, considering the rampant inequalities in income, it is high time the Government did something concrete.

DEVSHI MODHWADIA,

Porbandar

Guiding Spirit

Baba Amte stirred the conscience of the youth and exhorted them to work for the impoverished masses (Obituaries, February 25). He has left an apt message for us:

*Where there is fear,
there is no love.*

*Where there is no love,
there is no God.*

R.D. SINGH, *Jammu*

Lost Icons

Indian politics in recent times has followed the trajectory of zero-tolerance

towards ethics and morals ("Clipped Wings", February 25). How can chauvinists like Lalu Yadav and Mayawati offer any progressive vision to the new crop of leaders who want to carve a niche for themselves.

ARVIND K. PANDEY, *Allahabad*

Today's youth have different ideals and are not enchanted by revolutionary concepts and political agendas. They are far more intelligent and industrious than the generation before and are not foolish enough to perceive the politicians as their icons.

SHEILA RAJKUMAR, *Chennai*

Unnatural Call

Eco-anxiety is an affliction ("Perils of Eco-Anxiety", February 25). The fears expressed in the article, though in a lighter vein, are meaningful. Too much worry about global warming will only retard our progress.

K.S. THAMPI, *Chennai*
