

An **IMPACT** Feature

Fashion Village presents India with a vibrant, practical and international lifestyle and business experience at par with the best cities in the world.

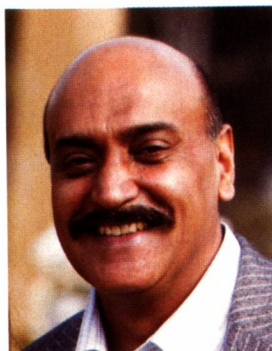

The town planning encompasses landmark architecture that is a harmonious mix of commerce and design in beautifully landscaped surroundings. The township is based on an environmentally sound module, with an emphasis on eco-friendly energy solutions. Town planning will maintain a walk to work model to facilitate easy and pleasant commuting with the environment.

Fashion Village will provide a permanent venue for fashion weeks and events, fully equipped with all the necessary facilities and infrastructure to facilitate business between the Indian design fraternity and the foreign buyers. These facilities like amphitheaters and auditoriums would create a permanent platform for the foreign designs and buyers to interact with the home grown designers.

In the offing is also a giant, integrated, well managed and maintained retail zone covering more than 3 million square feet. This would include carefully segmented malls and hi-street featuring luxury, prêt and fashion brands.

The living spaces include luxury apartments, villas and modern hi-rises well supported by a gamut of community centers, sports clubs, gyms, spas and health clubs. The hospitality industry will be well represented by 5 star / boutique hotels and serviced apartments. Commerce will be a pleasure with business and convention centers; trade expo centers and corporate offices. The Fashion Village will be equipped with energetic leisure spaces such as restaurants, night clubs, theaters and art galleries. To shape up the future, specialized education would be made available in addition to primary and secondary schooling.

A crafts bazaar would make the rich Indian heritage of textiles and handiwork readily available for commercial interpretations and doubling as attraction for foreign business visitors.
