JEWELLERY WATCH

BY PC JEWELLERS

How to Clean Gold:

1. You can clean gold jewelry with a soft toothbrush and some soapy water (dishwashing liquid works fine for this).
2. Dip the toothbrush in the water and use it to get into all of the crevices.
3. Rinse the piece in warm water until the water runs clear.
4. Buff your piece dry with a soft, lint-free cloth to make it shine.
5. If you prefer, you can also use a non-abrasive jewelry cleaner that you can buy at the store. If your gold jewelry contains gemstones,

Ph.: 28728833, 28720811.
