

LEADERSHIP FOR THE 21ST CENTURY

Obviously, the 21st century needs new leadership to take on the new challenges. The areas of engagement are not just politics and economy, they extend to culture and development, science and technology. The new battlefields extend to areas as diverse as climate change and cyberspace. The war on carbon monoxide is as important as the war on terror.

The INDIA TODAY CONCLAVE is a congregation of the finest minds. Out of their deliberations will emerge the testament of change.....

And a new brand of Leadership For The 21st Century.
