

A high-risk fund that offers rewards commensurate with the amount of risk you take

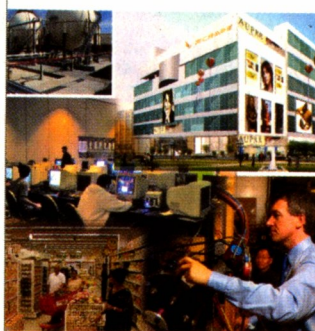

Equities for Long-term Growth

The Indian stock market has seen unprecedented growth over the past few years. Indian economy has emerged as one of the fastest growing in the world; over the Tenth Plan period (2002-7), the country's GDP has grown at an average rate of 7.6%, accelerating to 9% in 2005-6 and 9.4% in 2006-7. More importantly, all this growth has come with a big improvement in macroeconomic stability.

Several new equity and related products have found a home in India, aided by the zooming markets and growing economy. One of the most significant of these products is the Unit Linked Insurance Plan (ULIPs), offered by Life Insurance companies. ULIPs give the dual advantage of financial protection with wealth creation. ULIPs come with multiple fund options that one can choose from as per his risk appetite.

ICICI Prudential Life Insurance has a number of funds to suit one's investing style. There are aggressive funds like Multiplier that invests in equities while for those who are less averse to risk there are funds like protector where capital preservation is the main objective. There are also Lifestage funds that automatically adjust the debt:equity exposure as per one's age. ICICI Prudential Life Insurance has recently added another feather to its cap with the launch of the R.I.C.H. fund. The first of its kind in the insurance industry this fund gives the unique opportunity to

What's on Offer

RESOURCES: Investment in companies in the business of natural resources or their derivatives like oil, metals and agriculture-related firms

INVESTMENT: Investment in companies that will benefit from investments in new capacities in a range of industries and services; firms involved in capital goods, engineering and infrastructure

CONSUMPTION: Investment in companies that will benefit from rising consumption; such as durables, entertainment and media

HUMAN CAPITAL: Investment in firms leveraging human capital; like technology, pharma and biotech

benefit by investing in four high growth categories—resources, investments, consumption and human capital—that fuel the growth of India's economy.

What makes R.I.C.H. fund stand out from the slew of focused funds being launched is that it offers investors the benefit of higher potential returns from not one, but four high growth categories. Also, these categories are seen as the drivers of India's growth and are thus expected to deliver healthy returns for the long-term investor.

The fund has a clear mandate and objective to generate superior long-term returns from a diversified portfolio of equity and related instruments of companies operating in four types of industries mentioned above. The fund has the option to allocate as much as 100% in equity and related securities, thereby giving the portfolio a far greater chance to generate high returns riding on the equity wave.

R.I.C.H. fund is a welcome addition to the existing suite of funds which ICICI Prudential Life insurance offers with its ULIPs. The company now has a range of fund options that suits a wide spectrum of investor preferences. In addition to the conventional aggressive, conservative and balanced funds, the company now boasts of Flexi-cap, sectoral and dynamic funds (funds that automatically adjust their debt-equity mix)—a range that few other insurance firms can offer to the ULIP consumers.
