

Each HP Business notebook goes through over **95,000 hours** of total testing process.

Hewlett-Packard invests **\$3.5 billion** annually in Research and Development worldwide.

HP Ultra-Capacity Battery gives your HP Business notebook ultra-fast charging and 16 hours of battery life.

The **HP Device Access Manager** helps you selectively disable USB and other writable storage devices while keeping the readable feature on.

The **HP Disk Sanitizer** is a security feature that lets you delete all the data in one go, so that it cannot be easily recovered even with professional help.

The fact is that the features mentioned here - nine in all - are available on **HP Business Notebooks**. So when you buy one, for instance the HP Compaq 6710b Business Notebook, powered by Intel® Core™2 Duo Processor, you get features that are world-leading and cutting-edge. It's no surprise then, that HP is the preferred technology partner of companies the world over.

And for peace of mind everywhere you go, it's backed by our exclusive HP Total Care services.

A new PC preinstalled with Windows Vista® Business helps you manage and protect key data, resources, and employees without a dedicated IT professional.

The **HP Dura Finish** and **Dura Keys** keep your HP Business notebook scratch resistant so that it can be used up to 3 years without any visible wear.

HP QuickLook enables you to access your email, calendar, task and contact information from standby, off or hibernation mode in only 30 seconds with the touch of a button.

The **3-D Drive Guard** in the HP Business notebooks has 3-D Digital Accelerometer that acts as a motion sensor and temporarily parks the hard drive in case of any sudden movement.

HP Drive Encryption under **HP ProtectTools** encodes every bit of information on your hard disc volume and prevents unauthorized access.
