"By 2010, almost 30% of the targetted 3 m Suzuki cars will come from India."

SHINZO NAKANISHI, MD & CEO, MARUTI SUZUKI

This dramatic growth will be powered by India's middle class. In the next 20 years, over 291 million people will move from desperate poverty to a more sustainable life, and India's middle class will swell by more than 10 times from its current size of 50 million to about 500 million people. By 2025, over 23 million Indians—more than the population of Australia today—will number among the country's wealthiest citizens.

From being a poor cousin of mature markets to blue ocean opportunity, comprising a billion consumers, Indian operations of multinationals have become their growth engines. In the last three years, few global companies have not had their board meetings in India or flown down key executives here to understand the Indian market better. In the recent past, Nokia, LG, HSBC and Standard Chartered Bank have held at least one board meet-

ing here so that the decisions pertaining to Indian investments can be put on the fast-track. According to H.B. Lee, president and CEO of Samsung, South West Asia operations: "Indian operations have become significant because they have lived up to or even exceeded the expectations of the parent company in terms of sales, manufacturing and R&D. They are also contributing positively to making the parent's bottom line healthier."

As India's stature in industries like IT and telecom grows, global companies utilise Indian expertise to chart their course in other markets too. In March, HSBC Holdings Plc appointed chief mentor of Infosys, N.R. Narayana Murthy, on its board as an independent director. Besides the advantage of numbers, India is also adding value to other operations of the parent company. So the next time you buy a Korean or a Japanese consumer
