

Over 5,589,649 km ahead.

The E-Class, the most tested car in its class.

► Practice makes perfect. Anyone who performs before a demanding audience – whether a pianist, an actor or a football player – will tell you that. We believe that this old axiom holds true for cars too. Which is why we subject the E-Class to hurricane winds, Arctic winters, and blazing temperatures in the world's largest all-weather wind tunnel. To ensure that the E-Class you drive delivers superb performance mile after mile, year after year. After all, we value an appreciative audience as much as anyone else. So arrange for a test drive and experience the culmination of constant refinement. **Unlike any other.**

Mercedes-Benz

Accessories, fittings and features shown or mentioned may not be part of standard equipment. Mercedes-Benz car series W211 meet Bharat Stage III emission norms.
