

MRF PRESENTS THE **GREEN DRIVE** **ZSLK** INDIA'S ECO-FRIENDLY CAR TYRE

India gears up for the Green Drive. MRF launches the new, eco-friendly tubeless MRF ZSLK. Made of silica reinforced tread compounds that improve fuel efficiency and give you a safe drive. A tyre that gives you comfort and speed without disturbing the environment. A great drive for you. A green drive for the country.

MRF ZSLK INDIA'S ECO-FRIENDLY CAR TYRE

TUV, Germany has tested MRF ZSLK tyres in the size 175/65 R14 82T tubeless and has found the rolling resistance lower than ordinary carbon black tyre by 15%-25% at different speeds.

Normally low rolling resistance results in better fuel efficiency while driving on roads. Motorists are advised to always maintain correct inflation pressure, this influences tyre life, fuel economy, safety and operating performance.

Initially available for Ford Fiesta and Honda City. MRF ZSLK Tyres available at select MRF T&S outlets and select MRF dealerships.
