

A new philosophy of trade and business

PIMM founder and President Reynald Henry Katz

"I found one showroom, but there was a waiting list of 2,500 companies! Then I knew that there was a market - that I could open PIMM,"

negotiate, interact face-to-face, develop personal relationships, and evaluate physical products or samples. Comments Katz, "In the past decade, many people thought the internet was the only way of doing business. However, at the end of the day, people want to look at your product, want to touch your product, look people in their eyes, discuss the price, and build relationships. That is what they will do at PIMM."

PIMM provides the ideal environment for international industrialists to interact and build long term business relations

PIMM is the latest and most prestigious project in a long line of innovative business ideas that Katz has masterminded throughout his career.

Starting out in the cosmetics industry, Katz conquered the lion's share of the worldwide nail polish market with a revolutionary "anti-cracking" formula and became a dollar millionaire already at 19. Since that time, Katz has repeatedly managed to break new ground by targeting previously unexplored markets or market segments. In 2001, after developing the concept for the first internet duty-free ecommerce business in the US, Katz made a move to Panama. The idea of opening a wholesale merchandise mart in Panama was born in 2006 when Katz himself needed a showroom to display his products. "I found one showroom, but there was a waiting list of 2,500 companies! Then I knew that there was a market - that I could open PIMM," says Katz.

Based on his own experience in sales, Katz firmly believes in the traditional way of trading where sellers and buyers can

How to secure a showroom at PIMM

Buying a showroom at PIMM is neither expensive nor difficult:

1. Log on to PIMM's website at www.pimm.com.
 2. Find the relevant building/product category
 3. Book unit with payment of \$1,000-\$3,000 depending on unit's size
 4. 30-35 days later, pay 10% of showroom value
 5. Every 6 months, make additional payments of 10% (3 times)
 6. Pay remaining 60% when the showroom is ready
- Showrooms begin at \$125,000 for 50 square metres. Leasing options are also available. Under a special agreement, Indian manufacturers investing more than \$50,000 in PIMM are eligible to visas for themselves and their families.

Taking PIMM to India

According to PIMM founder and President Reynald H. Katz, the concept of PIMM may easily be exported to other locations around the world. Elaborates Katz, "We will export PIMM to many countries. In India, for example, they must have a mart like mine in big cities like Bombay, Delhi, and Bangalore. PIMM will be a very useful concept there, because the Republic of India is divided in different regions and each one has to promote its own manufacturers and exporters. But PIMM will also be exported to other countries like South Africa and the United States. In Taiwan, they just finished a mart in Taipei which cost \$3bn. PIMM can do the same 3 times cheaper, so PIMM as a profitability scheme is much better and bigger," concludes Katz.

To be able to open PIMM in India, Katz is looking for a local partner. "In India, I would love to partner with Tata or other companies including real estate brokers. It is very important for us to have local partners who know the rules for doing business in their country, have the key contacts, and add credibility to the project."

To expand PIMM internationally, Katz is aiming to raise \$10bn and is looking into the possibility of going public in Malaysia, Hong Kong and India.
