

Technologies, V Customers, Caritor India, Satyam Computers, HCL Comnet, I-Flex, L&T Infotech, Infosys, Nucleus Software, Mahindra & Mahindra, R System, Magic Software, Syntel, Wipro Infotech, HCL NEC System, Convergys, Mettler Toledo, SR Infotech, Green Field and Motherson Techno Tools Ltd have been regularly conducting interviews in the Galgotias Campus, absorbing a large number of students every year.

"The placement record at all the Galgotias institutions speaks volume of group's quality and achievement. The placement cell of GBS remains in touch with the corporate world, for best training facilities. Tie-ups with the corporate world give the institution the opportunity to organize regular visits to business houses and companies so that the students not only gain practical experience of what they have learnt in the classrooms but also acquaint themselves with the functional and environmental culture of different organizations."

"We don't look at placement as a standalone component. For us, placement is the culmination of the skills we teach our students. We work towards the overall development of a student right from day one thereby, giving them the requisite skills required to meet the professional challenges of life," says Galgotia.

The course curriculum at GBS has been designed in a way to make it more stimulating so as to prepare the students not only for a promising career with business acumen, but for meeting practical challenges as well. The trimester PGDM courses structured at GBS have a wide range of the most contemporary and innovative curriculum, designed to enhance knowledge, experience, attitude, integrity, communication skills and overall business acumen. The subject choice in PGDM ranges from Finance, Human Resource Management, Marketing, Systems (Information Technology) and Operations Management to International Management. The specialization in International Business focuses on areas such as International and Strategic Marketing and Forex Management. It focuses on Technology Management, a combination of Information Technology & Management, comprising two sections - first, the management of a collection of systems, infrastructure and information, and second, the management of information technology as a business function. It is popular with students having relevant professional degree.

"The GEI has taken up a challenge not only to give technical and corporate training to the students, but also to guide them to be self-confident and be better human beings. The overall training focuses on making the student feel confident and developing their leadership qualities as well as managerial skills."

Suneel Galgotia
Chairman, Galgotias Educational Institutions (GEI)

GBS also provides scholarship to meritorious students. The school boasts of an eminent in-house faculty, supplemented by visiting faculty from industry/business and foreign universities. *"Experienced and proficient faculty plays a vital role in building a sound foundation for the career of the young. That's why we take care in choosing our faculty members"* says Galgotia.

With its highly qualified faculty, state-of-art infrastructure and modern methods and tools of teaching and learning, GBS is certainly becoming the preferred institution for students with dreams to make it big in the corporate world.

We consciously endeavor to facilitate nourishment of future leaders cum managers under the aegis of
