

The adult in us said,
make a donation.
The child in us said,
make a school.

Not so long ago, the children of Chitta, a long forgotten village in UP, went to school carrying small mats. The school had no proper furniture, no electricity and barely any teachers. A large donation to the school would have been an easy option. But we decided instead to build a new school with all modern facilities. Today, the children of Chitta are receiving quality education. The story extends to Anoopshahar, Rewa, Bhuj, Dalla, Chunar, Gurma, Samirpur, Guna, Solan and NOIDA where we have built 12 schools, 2 ITIs and 3 universities for over 20,000 students.

For over three decades now, the Jaypee group has kept its promise to serve society. With an objective to provide affordable quality education, we have established 3 universities, one every year between 2001 and 2004 (**Jaypee Institute of Information Technology University, NOIDA established in 2001, Jaypee University of Information Technology, Solan established in 2002 and Jaypee Institute of Engineering & Technology, Guna established in 2003**) a feat unparalleled in independent India of a corporate group sponsored educational initiative with not-for-profit objective.

While we have made our mark in areas as diverse as Civil Engineering & Construction, Power, Cement, Hospitality and Real Estate, what gives us contentment is seeing our students grow into self-reliant and confident citizens. We have empowered the masses through the power of affordable quality education. And this has affirmed our future plan of touching the lives of one lac students by 2014.

It is our dream of a brighter India that gives us the courage to brave the odds and emerge successful. It's no small dream. But then, it's not too big either.

Construction
Power
Cement
Hospitality
Real Estate

— NO DREAM TOO BIG —
