

flaking

[Paint on Ordinary Putty]

no more flaking

[Paint on Birla White Wallcare Putty]

Thank Birla White Wallcare putty. Unlike ordinary putty that is not water resistant, it doesn't allow the dampness on the walls to cause the paint film to flake*. In fact Birla White Wallcare putty binds perfectly with the surface even if it is damp. Forming a smooth and strong foundation. So that your walls stay beautiful for years to come. Without any trace of flaking.

- Water resistant
- For both interiors / exteriors
- Minimal scraping required before repainting
