Katraj Campus, Mumbai - Bangalore Highway, Katraj, Pune 411 046. Tel.: 020 - 32 32 32 39 info@poonaschoolofbusiness.com

Professional education is gradually becoming one of the largest organized sectors across the world and is continuing to grow by leaps and bounds. With the buoyant Indian and Asian economy, educational institutions are playing a major role in shaping it up by providing trained resources for the industry. While there are very few institutions in India which can boast global recognition, Poona School of Business has been known for its pioneering efforts in the field of education and research.

Poona School of Business (PSB) is one such example of excellence that has got industry recognition for its various training programs including Bachelors and Masters Degree. PSB has already received appreciation and encouragement from some of the fortune 500 companies. This initiative was made possible under able leadership of Dr. Suresh Vishwanath (Director) along with Mr. Sumit Singh shaped up PSB's industry integrated program for meeting challenges and global recognition.

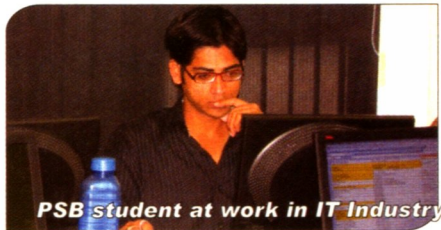

The Bachelors (BBA/ BCA) & Masters (MBA) degree program has state of art labs and research center with round the clock access to resources. For the first time, students of Bachelors & Masters program get exposed to latest technologies and its application, work on industry projects with definite deadline & ownership, carry out research work and have industry internship during the semester.

Many of India's top 20 organizations have shown avid interest in not only recruiting these students but also participate in the training program such as Hewlett Packard, Oracle, SAP, Hughes, ICICI, Aditya Birla Group, Reliance etc. This will enhance the technology competencies of the student right through their degree program and makes them ready for professional challenges upon joining job. This also reduces the recruitment, training and orientation cost for the organizations which is a win-win situation for the companies & PSB.

Increasingly organizations are realizing that the quality of students graduating out of various colleges and institutions are substantially below par to absorb them directly at work. The reason attributed to is the age old curriculum & syllabus and poor quality of trainers/teachers. With such inputs, training has been made more experiential rather than exam based. Students are taught by trainers from the industry with exposure to latest technologies such as ERP Certification by SAP/ Oracle, Technical Writing Certification by Hewlett Packard, Certification on Specialization by premier institutions in India by Hughes Net Global Education, etc.

While in college, a large part of professional development for the students depends on practical training approach, exposure to the industry practices & processes, students being able to work while on campus, industry participating in the training process rather than only during placements etc. PSB has been able to successfully bring all these under one roof and extend a value-added professional training to the students of Bachelors and Masters Degree program. The professors & trainers at PSB have rich background of working with organizations such as ICICI, Reliance, Tata, Wipro, Infosys, etc.

With the changing face of industry & economy in India, professional institutions like PSB will be playing very important role with such value-added training programs.
