

# Canon

possibilities opens up.

EOS-1D Mark III \*This is a composite image.

Higher speed, finer detail.  
It's a new level of professional performance,  
only from Canon EOS Technology.

The beauty of the world around us extends even to things that cannot be seen with the human eye. The feathers of a bird in flight or the individual hairs on the mane of a galloping horse. To capture all the magnificent details of this fast-moving world, you need the highest possible performance.

Dual DIGIC III

processing power as previous types, enabling ultra high-speed shooting at 10 frames per second. The 10.1 megapixel CMOS sensor offers a wider range of ISO sensitivities and finer gradations. And Canon IS (Image Stabilizer) lenses correct for camera shake, ensuring super-sharp images. With Canon EOS Technology, even the world you cannot see will be revealed.

10.1 megapixel CMOS sensor

The kind of performance that only Canon EOS Technology can provide. Canon's new Dual DIGIC III processor delivers twice the image

EF Lens Series

The Digital EOS Series uses Canon EOS technology for superior image quality.
