

Ansals Institute of Technology

Scripting Success Stories

While the Indian secondary school education provides a sound foundation in learners' formative years, higher education leaves a lot to be desired. The quality institutions like IITs and IIMs are able to cater to only a small section. Thus need of the hour is to promote innovation in education. One such step has been taken by Ansal Institute of Technology (AIT), Gurgaon, which has brought international education within the reach of middle-class Indian families. AIT, a premier institute engaged in International Collaborative Education (under the transfer of credits system), offers affordable and world-class education, leading to prestigious UG and PG degrees from reputed and accredited universities in the US, Canada, Australia, UK and France.

Students who successfully complete AIT's broad-based 4-6 semester academic program (similar to the one followed in IITs) are eligible to transfer their credits into full-time UG degree programs of those reputed and accredited foreign universities that have scrutinized and approved AIT's syllabi for equivalence. The degrees awarded by accredited overseas universities are recognized all over the world. For PG programs, students complete one year (2-3 terms) in India and the remaining 1-3 semesters overseas. In Business Management, students have the option of completing the second year in India or overseas.

Scholarships: The advantages offered by the international collaborative academic programs are numerous. Every successful student from AIT is awarded a scholarship (upto \$ 12000) by the partner US universities for studies in the US. Not just that; John Deere, a leading multinational company, has sanctioned a grant of US\$ 100,000 to NDSU to support the exchange of visits by students and faculty for four years. In fact, John Deere has awarded 10 scholarships of \$1000 each to the top ranking AIT students during their studies at AIT.

Students who wish to go for a Bachelor's and a Master's degree can do two years studies at AIT followed by three years at the overseas university campus for dual degrees from SJSU/UWA.

Scholarships combined with the bulk of the studies in India makes it an extraordinary combination to enable the students from even middle-class families to realize their career dream by finishing their studies and getting coveted degrees from reputed and accredited overseas universities. This also gives a crucial competitive edge over those graduating from other reputed Indian institutes in seeking jobs in MNCs.

Flexibility: Students also have the flexibility to choose the majors and the pace at which the degree requirements can be completed. For example, they can complete a four-year undergraduate degree in less than four years under the accelerated academic program by attending additional terms in summer.

Exposure: After completion of a degree, students are legally allowed to work full time in the US for one year. They therefore have the opportunity to get invaluable international exposure to the best practices of the global corporate environment and learn more about the work culture in the US.

Track Record: Over 400 students from AIT have been accepted by reputed and accredited foreign universities in the US, Canada and Australia in the last few years. Most of these students have

Universities where AIT students are accepted include:

- Clemson University (USA)
- North Dakota State University (USA)
- San Jose State University (USA)
- North Carolina State University (USA)
- Eastern Michigan University (USA)
- Tarleton State University (USA)
- McMaster University (Canada)
- Windsor University (Canada)
- University of New Brunswick (Canada)
- St Mary's University (Canada)
- University of Science and Technology, Lille
- University of Western Australia (Australia)
- Deakin University (Australia)

Rahul Pruthi (AIT alumnus)

“The one year I saved by attending summer terms at AIT made me one of the youngest graduates and also among the youngest employees to get an H1-B (US work permit) in the US. Now, I am pursuing my MBA from world-famous Thunderbird School of Global Management.”

UG Courses offered at AIT

Engineering (Computer, Elec., Mech., Industrial)
Biotechnology
Nanotechnology*
Biosystems Engineering
Computer Science/Computer Information Systems
Business Administration
Hotel Management
Mass Communication
Retail Management

PG Courses offered at AIT

Business Administration
Retail Management (with Pantaloon Retail India Ltd.)
Software Engineering/Computer Information Systems
Computer Science

* proposed to start from session Aug 2008

gone on scholarships / assistantships to complete the overseas degrees. The AIT alumni in the US have won more than 100 President's and Dean's honor awards for their excellent academic performance. This special form of education has led to many success stories.

AIT students, after completing their BS degree, have got opportunity to do MS/PhD from such leading universities like Johns Hopkins, Columbia, Cornell, Georgia Tech, New York University, Thunderbird, Vanderbilt, University of Illinois, Keck Institute, Australian National University, Asian Institute of Technology, Embry Riddle University, etc.
