

Vision beyond comprehension

Lakshmi Group always maintained its business focus and turned itself into the largest and most efficient paddy processing company in the world. It expanded backwards into farming and procurement and forwards into retail products, marketing and power generation using non-conventional method. It experienced rapid growth in last 5 years with compounded annual growth rate (CAGR) of 41% in turnover and CAGR of 164% in profitability.

L EAF, the largest manufacturer of long grain non-basmati rice in the world started its plant in 1981 at Khamanon, near Chandigarh. From a small beginning the company today has 1.35 million MT paddy processing capacity which is growing every year along with by-products derived from the downstream processing plants.

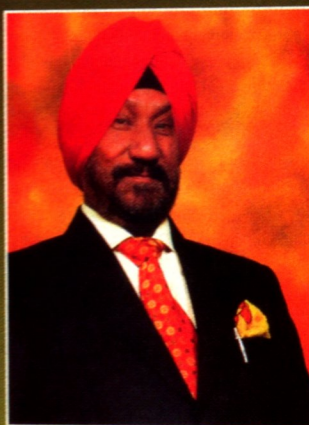

The company continued to deploy its internal accruals and fresh funds in its growth and today it aims to achieve Rs.9,000 million turnover for the year 2007-08. Over the last few years LEAF has put up ultra modern facilities which are among the best in the world to produce rice and other products such as rice bran edible oil, cattle feed and wheat flour.

The husk which goes waste in the process is being put to the best use to harness energy which is immensely needed today. The company has installed a 30MW power plant fuelled by husk instead of coal. This plant does not emit green house gases and eligible for carbon credits under Kyoto protocol. The ash generated from burning of husk will also be utilized gainfully.

LEAF had an IPO in 1994 at Rs.50 per share (Face Value Rs.10) and issued 1:1 bonus shares in the year 2000. The shares of the company are listed on National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) and its market capitalization as on date stand at around Rs.17,000 million. Due to the company's fundamentals and growth plans the company's stocks are held by leading Foreign and Indian Financial Institutions to the extent of 38%.

Vision and Mission of LEAF

The company aspires to achieve backward and forward integration and expansion of production capacities to be leader in agricultural processing and distribution business. It also plans to build several environment friendly biomass
