

Is your family living with germs?

Ordinary surface cleaner and phenyls fail to make your home germ free

You don't realize it, but there are unseen germs lurking everywhere in your home. Ordinary surface cleaners just make your floors look clean, they don't disinfect. Phenyls give some disinfection, but they do not clean and also leave a hospital like smell. In fact, even after regular use of phenyls, there may be enough harmful germs, bacteria and disease-causing micro organisms that can cause infection and ill health in your family.

Lizol kills 10 times more germs than ordinary cleaners and phenyls

Lizol's superior formulation ensures that you get 99.9% germ free surfaces in less than 60 seconds. It kills ten times more bacteria than ordinary cleaners and phenyls.

Three unmatched benefits of Lizol 3-in-1

1. Kills 99.9% germs in just 60 seconds.
2. Cleans tough stains.
3. Leaves a pleasant fragrance.

Lizol can be safely used across the household for disinfecting surfaces like floors, taps, toilet handles and seat, gas stove, kitchen slab and kitchen sink.
