

Mr. J. S. Betrabet,
Chairman
Suprabha Group

Research has always been central to its mission and it has numerous innovations to its credit. As Mr. Bantwal puts it, the Yantra, Mantra, Tantra, are indigenously developed by Suprabha. Some of the concepts introduced by Suprabha are unique and first of their kind in the world. Take for instance the use of organic chemicals, as against inorganic ones, making things safer for people. Or water as against solvent / distillates as rust preventive carriers.

Today, Suprabha, better known as a Corrosion Solutions Provider, is an ISO:TS 16949 accredited organisation, the first and probably the only VCI manufacturer in the world, to have this certification.

With a deep insight into the corrosion realm and a strong focus on customer satisfaction, Suprabha has successfully captured major share of the Indian market and is all set to storm the International market. Today Suprabha is a Single Window Solution Provider for all types of rust prevention needs for both ferrous and non ferrous metals. Its customer base spans across the entire spectrum of engineering industry- Automobile and Ancillary, Steel Mills, Textile Machinery, Light and Heavy machinery, Electric and Electronics, Power plants etc. Its meteoric rise from a mere INR 0.3 million turnover to INR 300 million in itself is the proof of this.

Suprabha with its stronghold over quality and eco-friendly focus has now embarked upon both backward and forward integration of its operations. It has already commenced its expansion in building capacity for future requirements. Turnkey packaging solutions have been planned for the future. They include reusable boxes and pallets which meet International Standards. Many other projects are also on the anvil.

The Suprabha Group has left its indelible mark on the Packaging Industry and has emerged as a major force to reckon with.
