

Go single after 40.

Looking and feeling young is as important to you, as it is for me. Especially after 40. Which is why I recommend Varilux 3-in-1 Progressive Spectacle Lenses - which allows you to go single. With it you can see near, far and in-between, without the embarrassing dividing line of bifocals. What's more, with Varilux lenses you don't just get back the vision of your youth, but also start looking smarter. So go ahead, live life to the fullest. Visit your optician today.
