

Equality for all through Education

Technical excellence in rural area needs remarkable educational expertise and the Kongu Vellalar Institute of Technology Trust (KVITT) promises just that. Founded in 1983 as a Polytechnic college this institute now offers 10 undergraduate programmes and 13 post graduate programmes in Engineering and Management science and has doctoral degrees. It even takes care of primary education for the community. The student strength is over 6000 and the experienced faculty is 700 in number. The Kongu Engineering College that will be celebrating its Silver Jubilee this year was adjudged as the best for the year 2001 by the Indian Society for Technical Education (ISTE). The college has been among the top five out of more than 250 in the self-financing category in Tamilnadu. All programmes offered by the college are AICTE approved and accredited by NBA. The college has an Industry Institute Partnership Cell (IIPC) funded by AICTE.

The 170 acre lush green campus, 12.14 lakh built up space, IT park, 1500 computers, well equipped laboratories, library with over 50,500 collection of books and journals with on line subscriptions are some of the many facilities open to the students. Needless to say about men's and women's hostels within the campus that houses nearly 3000 students. Extra curricular activities are promoted and there are indoor and outdoor stadiums.

The college is widely recognized for its academic excellence and always bags the maximum number of gold medals and ranks awarded by Anna University to which it is affiliated. Deserving students are given scholarships and so far more than 80 lakhs has been used for this purpose. It is no surprise that reputed companies like CTS, WIPRO, HCL, TCS, Infosys, Caterpillar, and L&T hire the students immediately. Many students get dual placements too before they even leave the institute. All praise goes to the highly experienced faculty members. The college conducts international Conferences periodically.

The College provides training, testing and consultancy services to a number of leading industries such as NLC, SIEMENS, MALCO and so on. AICTE has recognized the creditable work done by the IIPC of the college by awarding 'Grade A Excellence' and has provided additional funds for pursuing its activities.

In an effort to promote entrepreneurship and incubate businesses, the college runs a Technology Business Incubator (TBI), partly funded by the Department of Science and Technology, Government of India. The Government of India has sanctioned Rupees 1.45 crores as Seed Fund. This fund will be used to provide financial assistance to aspiring entrepreneurs who have technically and financially viable ideas but lack financial strength to implement those ideas. The college also has an Entrepreneurship and Management Development Cell (also funded by AICTE) which strives to instill entrepreneurial qualities in the students.

While the Quality Management Systems of the college have been certified as per ISO 9001:2000, various Open House Exhibitions are organized every year.

The all round performance of the college has been recognized and rewarded by the grant of autonomy by Anna University Coimbatore and University Grants Commission.

The Institutions run by the trust are as follows:

1. Kongu Engineering College,
2. Kongu Polytechnic College,
3. Kongu Arts & Science College,
4. Kongu Industrial Training Centre and
5. Kongu National Matriculation School.

Value based quality education for developing the student as a competent and responsible citizen is what Kongu Engineering strives for.
