

Committed to provide compelling solutions to consumers

Kensaku Konishi
President and CEO, Canon India

Canon India is one of the fastest growing companies in its business segments. It is the market leader digital camera and digital copiers segment, enjoying a market share of 27% and 24%, respectively. The company enjoys a 10% market share in the printer segment, making it the number two player in the country. Canon expects to touch Rs. 700 cr revenues with a growth of 40% in 2008.

Canon has structured its business in India into 6 business divisions. Canon is today a formidable player in the Indian market with product portfolio of 140 products (100 in consumer segment and 40 in business segment) spanning across 10 product categories in all aspects of digital imaging space such as Digital cameras, Digital Video camcorders, Inkjet printers, Inkjet All-In-One, Digital Copiers, laser faxes, projectors etc. Besides, Canon also has application solutions which work on these hardwares. Canon India plans to launch 20 new products spanning all the business segments in second half of 2008.

Canon Japan attaches great importance to the Indian market. Says Kensaku Konishi, President and CEO, Canon India, "China is the biggest country amongst its Asian counterparts. However, India has seen the highest sales growth among all Asian countries. Also, we are expecting sustainable sales growth in the next decade and from this point of view India is very important for Canon Head Quarters."

Canon has a comprehensive range of sophisticated contemporary and cutting edge technology products. From a user perspective the objective of new devices is to cut through the complexity and make technology a positive ingredient in people's lifestyle - a way to connect, discover, entertain and get more things done - instantaneously and with ease and fun. "Consumers today are comfortable with technology because they enjoy a digital life be it at home, work or at play. The challenge is to continuously stay at the frontiers of technology development and be a pioneer in latest trends and Canon is committed to driving this revolution by providing compelling solutions to consumers," says Alok Bharadwaj, Sr. Vice President, Canon India.

"Canon had recently launched 23 new state-of-the-art next generation digital camera and camcorder products to maintain the lead in being a pioneer in technology with breakthrough technologies across categories and we're continuing the momentum with an expanded portfolio of stylish, next generation, easy-to-use

Sr. Vice President, Canon India

consumer digital imaging products that will help to make lifestyle a reality for more people every day. For our professional photography customers, we have a range of 60 lenses and accessories," says Mr. Bharadwaj.

With the recent launch of 23 new state-of-the-art next generation digital camera and camcorder products, we have introduced path breaking technologies in sync with the youth trends and lifestyle of today and have also churned 60% of camera division's product portfolio. The products launched present revolutionary ways for consumers to interact and enjoy their experiences with never before seen features and concepts. The stylish looks and the advanced technology of the products give them a distinctive edge in the marketplace. Canon has always been known for introducing the most innovative products with superior technology.

The products launched present revolutionary ways for consumers to interact and enjoy their experiences with never before seen features and concepts like motion detection, face select and track, AF point zoom in digital cameras. In DV camcorder category, Canon has introduced Double Flash Memory feature for the consumers. Canon with its heritage in digital technology is at the forefront of simplifying the consumer experience. The digital camera segment is highly competitive and Canon has been successful in providing apt services and support.

A big investment area for Canon India is opening of exclusive Canon showrooms which will showcase all its products. A special feature of these showrooms will be to educate customers about the technology and all other features of Canon products. The company recently opened its first consumer product showroom in Gurgaon which will be followed by 5 more such showrooms in 2008. Another 3 exclusive showrooms are being opened for business products.

"One of the major strengths of Canon is technology with as much as 10 per cent of the revenue going into research and development. In India, we have grown from 400 employees in 2006 to 650 employees in 2008. We have made big investment towards setting our organization and infrastructure in India this year and we have today over 340 distributors and 4000 dealers all over the country," shared Mr. Konishi.
