

UTTAR PRADESH IS THE FASTEST MOVER

Accelerated reforms triggered by mounting criticism and concern over the health indices seem to be delivering results. The state though is yet among the worst placed in health care.

PRIMARY HEALTH

VARIABLES: Inverse of infant mortality ratio (IMR), male IMR/female IMR, percentage of assisted births, homes with access to tap water, doctors/lakh population, sex ratio, expenditure on health and family welfare/population

reforms, not inaction. The success of Mizoram and Himachal Pradesh validates the principle that sustained reforms and investment in health and infrastructure bring investments that create jobs and markets enabling prosperity. This year the State of the States study reviewed the performance of states since the 1991 reforms. The surprise overall winner is Assam, which has moved from number 17 in 2006 to number 13 this year. This, despite the geographical constraints and political problems that plague the state. Politicians and political parties also tend to believe that headline-grabbing investments and big-bang policy announcements are the answer to the problems of a state. Yes, investments do help when they happen within time and big-bang reforms also create the environment for optimism. But, as with most things in life, the devil is in the small print and is about getting the basic tenets of governance right. It may sound tedious and old-fashioned but this is the bitter pill that the CEOs of the states must bite, if every inch of the country has to reflect the India Story.

The need is to get the tenets of governance right and CEOs of states must bite this bitter pill to bring the India Story to the masses.
