Fastest Mover

expenditure (interest, salary and pension) constitute 86 per cent of revenue receipts and 70 per cent of its expenditure. All key deficits—revenue, fiscal and primary—have doubled in the last decade with revenue expenditure rising by 14 per cent and receipts lagging at 12 per cent. Development expenditure as a ratio of GDP fell from 1.14 per cent to 0.99 per cent in health care and 4.20 per cent to 3.91 per cent in education. The solution is more income and investment—it has attracted the least foreign direct investment in the past 10 years. But all is not lost. Thanks to the liberal flow of remittances (Rs 25,000 crore annually) from its 20 lakh-odd NRIs and the growth in tourism (Rs 10,000 crore annual revenue), the state is witnessing a surge. GDP grew from 3.8 per cent in 2000 to 8.11 per cent in 2006-07. Per capita income has grown by 6.3 per cent clocking Rs 33,609 last year, overtaking the national average. However the state's huge welfare system, driving the Kerala Model, requires restructuring to sustain itself.

4 GOA Fiscally Healthy

- Best in Health and Macro Economy in small states

SHRIYA PATIL SHINDE

Goa's claim to fame is not limited to its sun-kissed beaches. As it turns out, the former Portuguese colony has the second highest number of affluent households in the country, after Delhi. Even as the Assembly recently passed a resolution recommending the Union Government grant special status to Goa, the state's initiatives in several sectors like health, education and finance have not gone without notice.

The passing of the Goa Health Services Develop-

KARNATAKA IS THE FASTEST MOVER

Surprisingly, despite the chaos and confusion that raucous coalitions trigger, the state administration through regime changes has held its own in maintaining law and order.
