

The **future** is a high-tech car
that can be controlled with a simple dial.

Multimedia Interface, only in the Audi A4. The new sedan.

The new Audi A4 is amazingly futuristic but delightfully simple too. It has high-tech features like Audi Drive Select, which adjusts its suspension; quattro®, our renowned permanent all-wheel drive technology; and Rear View Camera. But what makes it truly advanced is that it simplifies it all with Multimedia Interface (MMI). Access information, make calls, play music, switch TV channels or control air-conditioning – the touch panel and jog dial design of the Multimedia Interface makes controlling any feature a breeze. The new Audi A4. It is Vorsprung durch Technik at its simplest best.
