

■ **Dr. K. B. Goyle** - Dr. K. B. Goyle established his Hair Transplant and Cosmetic Surgery Clinic in Delhi in 1980, after practicing in the U.K. for many years. This was the first clinic of its kind in India, where all types of Hair Transplants for baldness, like Standard, Mini, Micro-follicular grafting and various other combinations are done depending upon the extent of baldness and individual requirement. Over the years, Hair Transplantation has undergone a lot of change. The latest new revolutionary technique for Hair Transplantation that is Follicular unit extraction (FUE) has been practiced in the clinic for the last many years. In this, there are no long cuts and stitches resulting in ugly scars at the back of the head. In addition, all other types of Cosmetic surgery procedures like Rhinoplasty (Nose Surgery) Breast Surgery (Male also) Face Lifts, Removal of Scars and Pigmentation of the face, correction of Bat Ears, removal of bags under the eyes and Liposuction (Permanent Fat Reduction) and various other operations are carried out on a regular basis for the last 28 years. The patients have come for treatment, not only from every nook and corner of India, but from many foreign countries including Europe and America. The charges are kept reasonably low in view of the socioeconomic condition of the country. The patients have found their overall experience very pleasing and satisfying, since under the guidance of Dr. K.B. Goyle the entire staff is very experienced and dedicated.

■ HÄCKER

kitchen. german Made. THE COMPLETE KITCHEN SOLUTION

PAIN RELIEF without SURGERY

How ? Ozonucleolysis™ is the injection of a special oxygen-ozone mixture into a slipped disc as an equivalent treatment to invasive disc surgery. The Chairman and the Founder of Doctor Kares Hospital at Kumar Medical Park, Dr. Vijay Sheel Kumar created Ozonucleolysis by the Kumar Protocol with scientists from Harvard and MIT and was the first to introduce this least invasive treatment to India in 2003.

What are the benefits ? No cutting, no scarring, no anesthesia and short recovery time for patients with severe back, leg and/or arm pain that has not responded to six weeks of conservative treatments (rest, pain medications, physical therapy).

What is Doctor Kares Hospital ? Dr. Kumar is a world renowned neurosurgeon and endoscopic surgeon who is the first fellow of Interventional Pain Practice in India and the President of the World Federation of Oxygen-Ozone Therapy. His team of exceptional physicians and surgeons at Doctor Kares gives patients the kind of pain-spine-joints care that they would expect as patients. **We never order unnecessary tests or recommend unwarranted treatments.** That is a Kares promise.
