Canon brings spectacular image quality to life in photographic works worthy of being called art. Made possible by Canon's stunning 21.1-megapixel full-frame CMOS sensor, high-speed dual DIGIC III image processors, and a wide range of interchangeable lenses, all designed for creative freedom. Enabling powerful digital artistry that surpasses the demanding requirements of professionals. For those with a rich imagination and lofty aspirations, Canon pursues innovation that is truly state-of-the-art.
