

India's No.1 private engineering institution sets sights on global ranking.

VIT's reputation for excellence grows

Like the true achiever who never rests on his laurels, VIT has raised its own bar of excellence even higher. It is this reputation of truly world-class education that draws over 2000 students from every state of India and around the world; who come to this lush 250acre campus, equipped with the best of facilities - and realize their full potential.

VIT offers 18 UG and 31 PG programmes, besides M.Phils and PhDs. In 2001, it was conferred the University status by the

Ministry of Human Resources, Government of India. The University has packaged excellent integrated five-year degree programmes and part-time degree programmes. The Business School also offers an integrated MBA degree which engineering students can complete in a total block of five years, building in analytical and project management skills.

VIT University was ranked No.1 among all private engineering colleges in an India Today survey of India's colleges. (2007)

Very soon, VIT, like India's IITs will be the gold standard to measure the world's very best technical education by.

International Accreditations

VIT is the first educational institution in India to get International accreditations for its programmes. The Institution of Engineering and Technology (IET), United Kingdom and the Energy Institute, United Kingdom have audited the Teaching-Learning Processes at VIT and accredited the respective programmes with highest validity of 5 years. Accordingly, the international accreditations are valid up to 2009.

VIT's stupendous growth comes from pursuing excellence in everything that it does: academic or environmental - thanks to the very professional governance system laid down since inception. The institute's renowned research facilities have drawn the finest minds from various disciplines like biomedical research, information technology, nanotechnology, optoelectronics and materials engineering; also research in basic sciences, applied sciences and biosciences.

GLOBAL CONNECT

VIT has signed 42 MoUs with other institutions especially overseas to enable exchange of faculty and students, joint programmes, and improvement of laboratory and library facilities.

It has active participation from Australia, Canada, China, France, Germany, Netherlands, Sultanate of Oman, Singapore, UK and USA. In the last eight

VIT - A place to learn; A chance to grow
