

Yogi of the highest order

"The present world is evading the spiritual path, the path of righteousness, it is important to bring the society back to this path", said Dr. Ashoke Kumar Chatterjee, the founder Director of Yogiraj Shyamacharan Sanatan Mission at the Seminar on 'Degradation of Human Values- is there a future?' held at Vivekananda auditorium, Secunderabad on Sunday January 20, 2008.

That aptly highlights the proceedings at the seminar that had illustrious personalities from all walks of life economists, historians, the judiciary, educationists, indologists sharing a common platform to express their valued opinions and arrive at a consensus on how to save humanity from degradation. The speakers included Justice M. N. Venkatachalaiah, Former Chief Justice of India, Dr. T. N. Chaturvedi, Former Governor of Karnataka, Justice J. Chelameswar, Chief Justice Guwahati High Court, Dr. V. R. Panchmukhi, Chancellor Tirupati Sanskrit University and Managing Editor Indian Economic Journal, Dr. Hari Krishna Satpathy, Vice-Chancellor Tirupati Sanskrit University, Yogacharya Dr. Ashoke Kumar Chatterjee, Founder-Director Yogiraj Shyamacharan Sanatan Mission (YSSM) and World Kriyayoga Master.

Bharata not India Yogacharya Dr. Ashoke Kumar Chatterjee spoke of the ills that continue to dog the society. "Ancient history states that this land was known as Bharat, the British changed the name to India. Even after 61 years of independence we are still carrying the name given by the Britishers. Its time we changed to the original name of Bharat, with which I am sure, the degradation will surely come down.

As Bhārata is a spiritual country it is quite befitting if we desire to make the inherent quest to realize the esoteric spiritual significance of the term Bhārata. "Bhā" = radiance, effulgence, resplendence, spiritual enlightenment; "ra" = spiritual source, spiritual essence, spiritual fortitude, spiritual favour, spiritual halcyon. "ta" = deliverance, attainment of spiritual bliss through the yogic boat. Thus the intrinsic significance of the term Bhārata is that when a yogi gradually practicing internal Pranayama through the heat essence latent in the navel settles at Kutastha envisioning the intensely resplendent soul-effulgence then he achieves salvation and soul-enlightenment. This state of a yogi is termed as Bhārata. For this reason, this part of the world has been adorned with the name Bhārata and this country is oriented towards Sanatana Dharma eternally. Origin of yoga is Bhārata hence map of Bhārata as a symbol of the human body is its yogic connotation. Since yoga is eternal, it's hallowed wings have spread outside Bhārata as well Yogacharya stated.

"There is a clear difference between being man and being human. The realization of the same would automatically bring enhancement of values. India is a country of spirituality and Sanatana Bharata teaches the humans to be good, to lead the path of righteousness, bring awakening to the common man and maintain peace. Only then we will have 'One man One world One religion One God'" adds Dr. Chatterjee.

Consensus : Justice M N Venkatachalaiah on behalf all panel Speakers summarized the seminar with the following: "All the speakers expressed that there is a future for mankind provided that they do not misuse Science & environment.

The Indian system of Kriyayoga is one of the solutions and unfortunately there are

many interpretations of it. The seminar ended on a positive note, that there is future for India and there are solutions to save our future generation from degradation of human values and a message from this mission to India and from India to the world."

EXCERPTS FROM THE INTERVIEW

Why has Yogiraj Shyamacharan Sanatan Mission been founded?

Due to the influence of crass consumerism the morality of people has degraded. Their minds have become imbued with selfishness. This Mission intends to upgrade humanity to the pristine glory of Sanatana Bharata.

Why is this Mission hosting this seminar?

India has deviated from her ethos with which she was originally permeated with i.e. love, peace, selflessness, hence the degradation of humanity. Therefore, the Mission through this seminar will endeavour as a first step to reorient deflected minds.

Why did you plan to hold this seminar in Hyderabad?

The Mission has its Head Quarters in Kolkata. It is engaged in multifarious activities like social welfare both philanthropic and spiritual. The uniqueness of this Mission is that its workers are exclusively householders leading domestic existence but reaching out to one and all.

The Mission has a strong presence in Hyderabad and proposes to make Hyderabad the main centre of South India reaching out to Chennai, Bangalore and Cochin therefore, is hosting this seminar the first of its kind to find a way to alleviate the misery and sorrows of man. The tentacles of materialism have gripped India removing her far from spirituality hence the miseries and sorrows. The Mission through this seminar plans to alleviate this suffering of mankind.

How exactly do you propose to elevate mankind to the pristine glory of Sanatana Bharata?

Man today is engaged in gross worship steeped in dualism therefore has remained oblivious about the inherent intrinsic worship, thus his mind is oriented towards the gross. Because of this man has harboured diversity to be his very own. Yogiraj Shyamacharan Sanatan Mission is endeavouring to uplift man from this grossness through Kriyayoga. Kriyayoga is the action or process by which man can achieve union with the Absolute. Kriyayoga is sublime soul – science. Soul is all pervasive and equanimous. Kriyayoga teaches man indivisibility, hence unity. Therefore the true equanimous state will arrive when man will accept the concept of one God, one World, one Religion and one Man. Only then will love, peace and solidarity be established in this earth and man will return to the pristine glory of Sanatana Bharata.

Is Kriyayoga is a cult, a sect or a tradition?

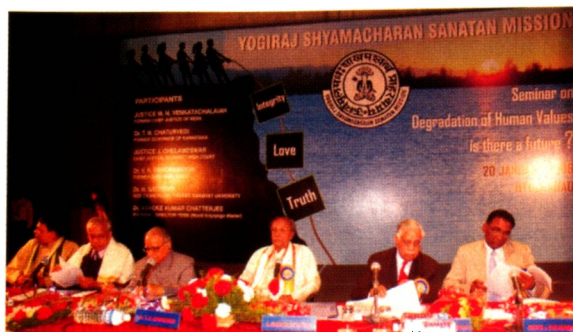

Certainly not. Kriyayoga transcends all barriers. Kriyayoga is all pervasive. It is eternal science coming down from aeons. A cult or sect is manmade. A tradition is also manmade, but Kriyayoga is eternally flowing.

How far has the mission achieved in propagating the tenets of Kriyayoga throughout the world?

The Mission has achieved in propagating the tenets of Kriyayoga more than was expected. Through the endeavour of this Mission a large number of people have understood the negative positivity they were headed for. The Mission has been able to enter into the minds of the people and spontaneously make man realize his kineticism, thus helping him to slowly and gradually understand the good effects of stillness.

Why is this Mission named after Yogiraj Shyamacharan and who is he?

Yogiraj Shyamacharan Lahiri (1828- 1895) was a complete householder Kriyayogi living in Benares who meticulously juxtaposed family, social and official discipline with austere spiritual practice. This Mission is committed to propagate the ideals and tenets of Yogiraj and Kriyayoga, the eternal soul science. To know more about him the book "Purana Purusha Yogiraj Shri Shyamacharan Lahiri" can be read.
