

Sustainable Solutions from FLSmidth

The view over Tysfjord from the Norcem plant in Kjøpsvik, Norway.

It's a good start.

The Kjøpsvik plant shown here was the first in the world to install HOTDISC combustion. FLSmidth supplies complete alternative fuel solutions that let cement and mineral producers use up to 100% waste-derived and biomass fuel in their pyroprocessing installations - without sacrificing production capacity or the quality of their product.
