

Denmark presents a unique opportunity for Indian companies who are not only looking for a Northern European hub from an operational perspective but also tap into the cutting edge skills and technology available there. Denmark is globally recognized as a leader in Mobile & Wireless Technologies, E-Governance as well as Wind Energy. It has also been rated the Best Place to Do Business over a 5 year period by The Economist Intelligence Unit recently.

Since most Danes speak English, it is very easy for an Indian to get around unlike some other European countries where it can be a challenge. Danes have also been rated the happiest people in the world in a recent survey. Traditional Danish strongholds in Maritime, Design & Renewable Energy present new opportunities for Indian companies going forward.

OPPORTUNITIES GALORE

Invest in Denmark is the official inward investment promotion arm of the Danish government and a part of the Danish Ministry of Foreign Affairs. Its India office is located at the Trade Commission of Denmark in Bangalore while its regional office is in Shanghai. Invest in Denmark has been present in India since 2004 and actively working with Indian companies in the areas of ICT, Life Sciences & Renewable Energy.

Invest in Denmark has over the past 4 years has successfully assisted companies like Suzlon Energy, Satyam Computers, ITC Infotech, L&T Infotech and Enterprise Systems and Solutions among others establish and consolidate their operations in Denmark. It continues to work with leading players in the ICT, Biotech and Renewable space, presenting opportunities and showcasing the knowledge and competencies present in Denmark.

Invest in Denmark will be happy to assist Indian companies who wish to explore ways in which they can tap into the knowledge and competency that exists in Denmark. The services are free and confidential.
