

"Is Your Money Safe?",
February 4, 2008

**"For a small dealer,
investing in stocks is
akin to riding an
Ambassador on a
Formula One track.
The risks overshadow
the benefits."**

K. CHIDANAND KUMAR, *on e-mail*

Sensex Sensitivities

Though the Government is trying to control the damage by telling the investors that the fundamentals of the economy are strong, the truth is just the opposite ("Is Your Money Safe", February 4). Had these fundamentals been strong enough, the Sensex wouldn't have nosedived because of recession in the US markets.

MANMOHAN BHATIA, *Delhi*

A fall in the stock market is inevitable. The investors should take this as an opportunity to buy good stocks which are currently available at reasonable prices.

BAL GOVIND, *Bareilly*

The story has failed to expose the ups and downs of the "stock markets" as a tool which the big players use to their own benefit at the expense of small investors. Under the

hypnotising influence of the market forces, small investors, who dream of their money multiplying overnight, are increasingly being sucked in the whirlpool of money and greed. More often than not, they drown in the cesspool of uncertainty and lose their hard-earned money.

VITULL K. GUPTA, *Bhatinda*

It is ironic that an abrupt drop in the Sensex became the cover of the magazine while the deteriorating social ethos goes unnoticed. Though the stock markets are a gratifying indicator of the material opulence of the nation, India will truly develop when there is a communion of material prosperity with spiritual richness.

VIJAY DANDIWALA, *on e-mail*

The rise and fall of the share market should put an average investor on the alert. There is today, a heightened need for

the investors to understand the basics and working of these markets.

AKHILESH KUMAR SAH,
Faizabad, Uttar Pradesh

In a market where speculators invest on borrowed money, foreign investors are making an exit and the investors are too greedy to make quick money, such a mayhem is slated to become a common feature. Our money is just not safe.

A. SRIKANTIAH, *Bangalore*

Everything that goes up has to come down. The crashing of the Sensex serves all those right who consider the stock markets a gambling den.

ABHILASH THADHANI,

Not so Common

The Offtrack on the struggles of C.M. Ganga Ram has set an example for the fame-hungry generation of ours that there are people who have been

working for the cause of humanity ("Common Man Campaigner", February 4). Hats off to INDIA TODAY for highlighting his work.

GURPREET SANDHU, *on e-mail*

Ganga Ram's untiring efforts to get a rail link to his native village in Andhra Pradesh prove that we can succeed in life only if we have a strong will power and firm determination. We must salute such real life heroes.

RATAN SHARGA, *on e-mail*

The moment I read the Offtrack on Ganga Ram, I knew this must be my colleague at the Andhra Bank. In 1978 when I met him, I could see that he was a man on a mission. I am not surprised to know that he is still leading a busy life. The initials C.M. stand for common man, which he is not.

ANAND MADABHUSHI,
Mumbai
