

How Saffola Functional Food™ helped me manage his cholesterol everyday.

marico

The fight to manage my husband's cholesterol has been a hard one. In the beginning I would wake up to him coming back from a jog. He would prefer apples over his favourite parathas. And to everyone's surprise, he even managed to lose his sweet tooth.

But then, in a matter of few weeks, things started to look down. The alarm clock wasn't loud enough. The sweet tooth was firmly back in its place. The greens made him go red in the face. And I was afraid that the battle was almost lost.

That's when I discovered Saffola Functional Food™. Now I could manage his cholesterol by simply making rotis. All I had to do was add a half kilo pack to two kilos of regular atta. A healthy mix of ingredients like oats, barley, fibre and soya protein, Saffola Functional Food™ for Cholesterol Management helps in reducing cholesterol. What's more, the rotis stay soft and tasty and can be part of everyone's meal.

So, while our efforts to manage his cholesterol seem like an on going battle, I sure have a winner on my hands.

To order online, visit www.saffolalife.com. Also available, Saffola Functional Food™ for Diabetics. Sms 'Saffola' to 57827 to know more. This is food, not a medicine. Results not typical. Saffola encourages you to exercise regularly and follow a healthy lifestyle. If on medication, consult your doctor before using the product. 29.9% decrease in LDL at the end of 3 months if the product is taken as per instructions given on the pack (Indian Practitioner-August 2005).
