

THE SAGAR SCHOOL RAJASTHAN

Residential Co-Educational School

International Baccalaureate®

Teaching, Nurturing and Encouraging Every Student

The Sagar School (CBSE Classes IV to XII) is situated on a 150 acre campus in the Alwar District of Rajasthan. The school is an hour and a half's drive from Delhi International Airport.

TEACHING EVERY STUDENT

Fine Facilities: We have a range of fine facilities available for all students. A well-stocked library, laboratories for every science and two computer laboratories support students' learning and provide a challenging environment for independent learning.

Excellent Teaching:

Faculty consists of teachers trained and experienced in delivering the CBSE and IB curriculum. Regular training by internal and external providers ensures that they are kept up to date on the latest methods of teaching while teachers from Europe help to inspire staff and students alike with new ideas and strategies.

Small classes of less than 24 and a high teacher-student ratio ensure that students gain the attention they need to do well.

Partial & full scholarships available for deserving candidates.

Assessing and Achieving Potential:

Students are carefully monitored throughout their school career. We aim to assess the ability of every student so that we can offer the support, advice and teaching best suited to each. We recognize that every student is unique and success depends upon giving the correct support to each individual not in providing one solution for all students.

CARING FOR EVERY STUDENT

Boarding life: Boys and Girls are housed in separate boarding houses. Each boarding house has 32 students with one teacher designated to supervise, support and care for

them. Each room houses five or six students and each student has his own cupboard, work area and personal space. Students also have access to the House Common Room where they can relax, play games, watch TV and chat with teachers always on hand to supervise.

CHALLENGING EVERY STUDENT

Challenges in School: We recognize that many of the most important lessons learned at school are experienced beyond the classroom. As a result, we put great emphasis on students'

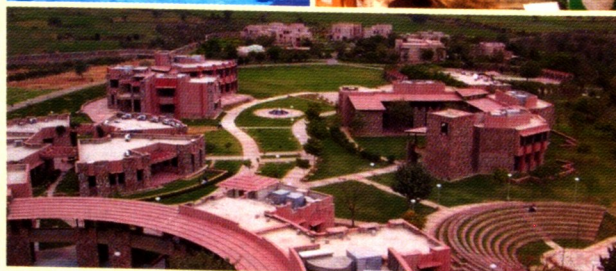

active involvement in sports, the arts and community service.

The school has a wide range of sports facilities ranging from a solar-heated swimming pool to indoor basketball, badminton and squash courts. Outside pitches cater for all team sports. Our aim is to support the talented sports player to achieve their highest standard while helping the less gifted to progress at their own pace.

The arts are another area where we aim to build love and skill. All students study art and music up to Class X and students are encouraged to develop both basic and higher skills. Our students are also encouraged to help others less fortunate. This is most obvious through the weekly

Adult Literacy Project organized to teach English to the children and Hindi to their parents in neighbouring villages. Every student is offered a chance to go on challenging treks each year.

Our students are also offered the opportunity to explore other cultures in depth with annual exchange programmes organized with schools in Europe and with international students visiting and learning at the school itself.
